

ASURCO

ROOFING & CLADDING

CAPABILITY STATEMENT

Asurco Roofing and Cladding (Asurco) is the exciting new addition to the McMahon Services Group of Companies and is the result of the acquisition by McMahon Services Australia Pty Ltd. The amalgamation of Asurco with the well-established McMahon Services Roofing and Cladding division offers existing and new client's access to a wide range of additional quality services available from a single supplier.

Company Overview

Asurco offers a comprehensive range of roof and wall coverings, delivering innovation, and the highest safety standards from concept to completion.

Our service capabilities include design, supply and installation for new build, replacement works, heritage works, suspended ceiling systems and acoustic linings.

We've delivered roofing and cladding works on a range of facilities across the defence, health, general commercial, institutional and educational sectors. Operating in rural, remote and regional areas, we have installed well over two million square meters of roofing and cladding throughout Australia and New Zealand.

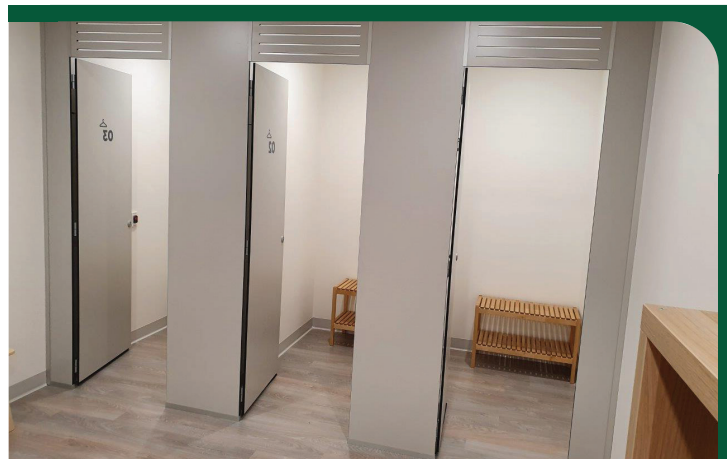

Known for our quality of work, we are one of the recognised leaders in the manufacture and installation of Glass-Fibre Reinforced Concrete in Australia, and are also the only South Australian manufacturer of toilet and shower partitions for all kinds of commercial and public buildings, using laminates, fibre cement and polymer plastics.

With over 50 years' experience working within the industry, we are able to provide expert advice to our clients on all roofing and cladding materials. We can ensure that the best materials and construction methods are implemented appropriately, accommodating to the different conditions to achieve whole of life saving outcomes.

Equipped with elevated working platforms and mechanical lifting equipment including, panel, lifters, knuckle boom, electric scissor lifts and a wide variety of cranes. We self-perform all works with our own qualified and experienced workforce.

Asurco Roofing and Cladding focuses heavily on safe work practices by implementing innovative solutions to protect our personnel when working at heights. This is achieved through implementing the safe work standards mandated by our management systems, conducting risk assessments, the use of safety harnesses, edge protection and scaffolding.

We can safely install roofing and cladding on both greenfield and brownfield construction sites and adjacent to operational industrial plants and occupied buildings.
