

Fully integrated tractor-scraper system.

Tractor - Scraper System

- ▶ 535 horsepower tractor
- ▶ Ejector scraper with 4.2m cutting width
- ▶ 16m³ capacity
- ▶ Fast blade response time
- ▶ Heavy-duty hydraulic cylinders to ensure trouble free ejection in the stickiest of soils
- ▶ Large throat opening, high lift gate, and high cross-tube front frame give you maximum visibility to the cutting edge and inside the bowl
- ▶ Fitted with Trimble Dual GPS
- ▶ Quicker process than excavator and trucks
- ▶ Less dust generated
- ▶ Safe. Cost Effective. Efficient.

As an award winning civil contractor, McMahon Services is at the forefront of innovation, continually improving our methods of operation.

The Tractor - Scraper Systems provides a more cost effective solution for excavation and backfill on large-scale civil projects than the traditional method of excavator and trucks. The Trimble Dual GPS control system allows for a stakeless excavation using one operator and reduces the requirement for an on-site surveyor.

The machine can also be used to strip thin layers of material across large sites and operates on slopes of up to 1 : 2.5 in grade and works on cross slopes and embankments.

The System can construct steeper stockpiles than previously undertaken using excavators and generates less dust on site.

Our complete in-house service offered across Australia, includes:

- ✓ Float Transportation
- ✓ Transport Permits & Escort Services
- ✓ Wet Hire Options
- ✓ Highly Experienced Operators
- ✓ Servicing & Maintenance Workshops
- ✓ Mobile Site Service Trucks
