

Industrial vacuum recovery.

Industrial Vacuum Recovery Unit

- ▶ 2200cfm (3700cub.m/h) liquid ring 6" pump
- ▶ Auxiliary diesel engine drive
- ▶ 10,000L capacity
- ▶ High-tensile mild steel construction
- ▶ Wet & Dry cyclone and blubber filtration
- ▶ Full hydraulic rear door
- ▶ 150mm (6") heavy-wall fixed suction pipe
- ▶ 150mm air-operated S/S rear discharge
- ▶ Work lights and revolving light

- ▶ 5,000psi (350bar), 23 L/min hydro-excavation pump
- ▶ Insulated power plant enclosure
- ▶ 800L internally-coated mild steel seal water tank
- ▶ Under-body twin hydraulic tipping hoists

The Vacuum Recovery Unit provides a high performance industrial vacuum service, capable of vacuuming solids through to oils and sludges.

McMahon Services has customised the unit to include a boiler (situated beside the "high pressure unit") to enable both cold and hot high pressure cleaning. The advantage of hot pressure cleaning is the ability to service oil spill clean-ups. This mobile, self-contained is ideal for emergency response works.

Our complete in-house service offered across Australia, includes:

- ✓ Float Transportation
- ✓ Transport Permits & Escort Services
- ✓ Wet Hire Options
