

McMAHON
SERVICES

Industrial Services

Comprehensive industrial waste management, waste storage, industrial cleaning, maintenance and 24/7 emergency response services

Capability

Industrial Services

Our Industrial Services division offers diverse capabilities and experience in waste management, waste storage, industrial cleaning, maintenance and shutdown works suitable for most heavy industrial sites across Australia.

McMahon Services provides ad hoc maintenance and spill management services for a variety of client across Australia including the Department of Defence, SA Power Networks, Flinders Power, Alcoa, Lendlease, the South Australian Health and Medical Research Institute (SAHMRI), John Holland and Watpac — with response times under 2 hours for most incidents. Our services cover urban, rural and remote locations across all states and territories of Australia.

Specialised maintenance contracts include 24/7 emergency chemical spill cleaning, safe transportation, storage and disposal of hazardous materials, fire and water damage repairs, and chemical relocation services.

Our core team in Adelaide can mobilise personnel and equipment to any location in Australia, supported by our resources in our capital city and regional offices and plant yards across South Australia, Queensland, Northern Territory, Western Australia, New South Wales and Victoria.

Our industrial services capabilities include:

- ▶ Vacuum loading
- ▶ Liquid waste removal
- ▶ High-pressure cleaning
- ▶ Environmental remediation
- ▶ Emergency response
- ▶ Abrasive cleaning
- ▶ Chemical removal
- ▶ Non-destructive digging
- ▶ Transformer flushing
- ▶ Industrial cleaning

McMAHON
SERVICES

Key Projects

Nyrstar Lead Smelter Shutdowns, Nyrstar, \$15 million/year, Port Pirie, SA

Queensland Alumina Limited Maintenance Contract, Rusal and Rio Tinto Alcan, \$7 million/year, Gladstone, QLD

SA Power Networks Emergency Response, SA Power Networks, \$930,000, SA

Plant and Equipment

The Industrial Services division is supported by a fleet of specialised plant and equipment including wet vacuum trucks, HEPA vacuum trucks, high pressure hot and cold units, excavators, bin trucks, elevated work platforms, scissor lifts and skid steer loaders.

We also offer clients full enclosed and lockable asbestos waste bins 2m3 to 20m3 for the collection of asbestos waste on industrial and resource sites. Multiple site collection services are undertaken periodically using Environmental Protection Authority (EPA) and Dangerous Goods approved transport vehicles. EPA waste tracking documentation is completed and provided for all temporary storage, transport and disposal activities.
