

Ballestrin.

Concrete Construction and
Remedial Services

Our Advantage

Ballestrin provide leading concrete construction services to the building industry across Australia. Our capabilities encompass formwork, reinforcement and concrete placement works, concrete remediation, concrete kerbing and concrete cutting.

Established over 50 years ago, we have extensive project experience across all areas of construction from commercial works through to industrial and mining projects. Ballestrin have successfully delivered a broad range of projects, positioning us as leading contractors within the industry.

We employ experienced operators and dedicated professionals supported with the latest in concrete technologies. Our project management team has a diverse range of experience and expertise, covering all aspects of construction.

Ballestrin can take on any type of concrete construction work from small complex works in challenging environments through to foundation work for large-scale projects. Our team is able to mobilise resources to any location across Australia.

Core Services

- Concrete Construction
- Special Surface Applications
- Formwork, Reinforcement and Concrete Placement works
